

How will teaching be adapted?

The teachers plan lessons to make sure the individual needs of every child are met. This may include using specific resources and strategies. If needed, the planning and teaching strategies will be adapted on a daily basis to suit your child's learning needs and is key to ensuring everyone can thrive.

- **Creating a supportive environment:** We focus on catering to diverse learning styles, using visual aids for visual learners and interactive activities for those who benefit from hands-on experiences.
- **Differentiating tasks:** We give children tailored challenges that suit their individual abilities, rather than taking a one-size-fits-all approach.
- **Implementing specific interventions:** We conduct small group work or one-on-one sessions to target particular areas of need, such as communication skills or social interaction.
- **Collaborating with teaching assistants:** Their support ensures that children are engaged and included in the learning process.
- **Continuous assessment:** We assess the effectiveness of our adaptations and seek feedback from children to refine our methods.

Our goal is always to foster a sense of belonging and achievement, so that every child feels valued and empowered to succeed in their learning journey.
